

## ONE SHOP. ENDLESS POSSIBILITIES.

No matter your industry or application, we custom-build cost-effective components with the quality and reliability you expect from the Robinson name.

### INDUSTRIES SERVED

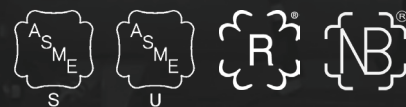

- Petro-chemical
- Phosphate
- Renewable Energy
- Water Infrastructure
- Power Generation
- Environmental
- Food Packaging
- Citrus
- Mining

### PRODUCTS INCLUDE

- Pressure Vessels
- Storage Tanks
- Piping
- Modular Skids
- Columns & Towers
- Shafts & Hubs
- Structural Components
- Custom Fabrications

### CERTIFICATIONS

- American Welding Society
- American Society of Mechanical Engineers
- National Board of Boiler and Pressure Vessel Inspectors

## ROBINSON MACHINE CO.

2985 Old Medulla Road  
Lakeland, FL 33811

## CUSTOM COMPONENTS. UNQUESTIONED QUALITY.

[RobinsonFans.com/Services/RobinsonMachine](http://RobinsonFans.com/Services/RobinsonMachine)

EXPANDED CAPABILITY.  
SAME OLD RELIABILITY.

ROBINSON MACHINE IS A CLOSE-TOLERANCE INDUSTRIAL MACHINING AND FABRICATION FACILITY, BUILT ON A 125-YEAR HISTORY OF SERVICE AND COMMITMENT TO OUR CUSTOMERS. OUR EXPERIENCE AND EXPERTISE ENABLES US TO DELIVER PARTS AND COMPONENTS AT A REASONABLE PRICE WHILE MAINTAINING THE HIGHEST QUALITY STANDARDS IN MANUFACTURING.

SUPERIOR SERVICE  
FROM START TO FINISH.

Our conveniently located, state of the art facility was built to handle every stage of your project from start to finish. Our experienced team of welders, fabricators, machinists and quality personnel are dedicated to providing our customers with the best service and craftsmanship possible.

MACHINING

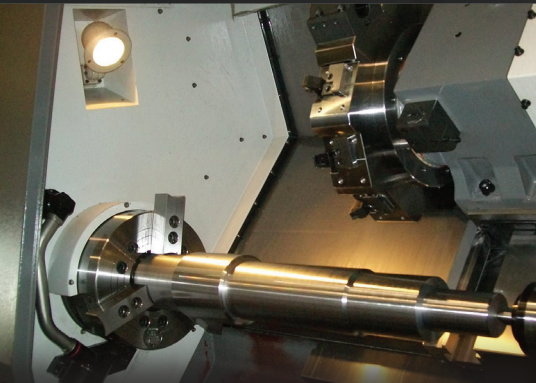

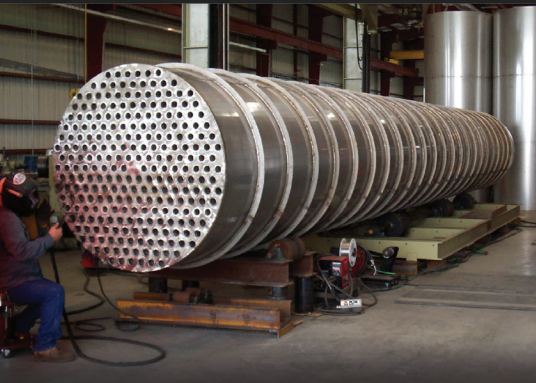

Our climate-controlled machining center features both CNC and manual machining equipment capable of performing the full spectrum of machining operations, including milling, turning, drilling and boring.

WELDING & FABRICATION

All of our welders are certified in accordance with AWS D1.1, AWS D14.6 and ASME Sect. IX. Our robust quality program ensures that your job is done right the first time. Our team of fabricators are well-trained in the use of our rolling, bending, forming and cutting equipment.

MATERIAL HANDLING

Our 40,000 square foot facility on six acres features 34-foot eaves, four 10 ton overhead cranes, three 5 ton overhead cranes and 6 strategically-placed 1 ton job cranes which enable us to handle almost any raw material or finished product with ease.

ALWAYS CUTTING-EDGE.  
NEVER CUTTING CORNERS.

Our equipment is capable of handling the tightest tolerances and can take on nearly any project with ease. Some of our key equipment and capabilities include:

CAPABILITIES

- Machine bar stock up to 190" long x 15" OD x 20,000 lbs.
- Straight line bore equipment up to 75" OD and taper bore up to 39" OD
- Machine rings/tubing up to 69" OD
- Roll plate up to 5/8" x 10' Carbon Steel
- 500 Ton Break Press with 12' length
- Cut keyways up to 2" wide x 30" long
- Recondition/repair shafting and rolls
- Hydrostatic and pneumatic pressure testing

SPECIALIZED EQUIPMENT

- CNC horizontal and vertical milling machining
- CNC lathes
- CNC Saw
- Vertical turning lathe
- Submerged arc welding station capable of 12' diameter x 45' long seam welds

PLANT INFORMATION

- 40,000 square foot production facility
- 20 ton overhead crane capacity
- 34 foot high bays

Don't compromise on quality. Contact us at (863) 581-8600 or [rmcsales@robinsonmachineco.com](mailto:rmcsales@robinsonmachineco.com) for a quote on your next project.
