

# Proven Fabrication for Large Industrial Skids

Extensive experience supporting power generation, mining, water treatment, and process equipment applications.

## Built to support complex, multi-component skid assemblies

Robinson Machine has extensive experience fabricating large structural frames, skids, and welded assemblies for heavy industrial applications. Our capabilities support tight alignment, critical interfaces, and customer-driven specifications required for complex skid systems.

- ✓ Large multi-component skid assemblies
- ✓ Heavy structural welding & fabrication
- ✓ Precision fit-up & alignment control

### ASME Code Certified Shop

- S, U, R, & NB stamps
- Welders qualified to ASME Section IX
- AWS D1.1 & D14.6

### In-house Machining & Fabrication

- Machining and fabrication under one roof
- Tight control of fit-up alignment
- Control of critical interfaces

### OEM & Program Support

- Proven OEM partnerships
- Repeat programs and long-term scheduling
- Disciplined quality systems

Supporting customer specifications, inspections, and turnover packages.
