Robinson Acquires Specialty Fabrication, Expanding Industrial Manufacturing and Fabrication Capabilities in Lakeland, Florida

Lakeland, FL — May 29, 2026 — Robinson today announced the acquisition of Specialty Fabrication, a fully integrated industrial manufacturing and metal fabrication operation located in Lakeland, Florida. The acquisition includes approximately 90,000 square feet of manufacturing space across a 9.23-acre industrial campus and brings more than 35 skilled employees into Robinson’s growing family of businesses. The newly purchased facility neighbors the current home of one of Robinson’s facilities.

“We’re excited to expand the Robinson Team,” said President Tricia Staible. “Bringing on new team members who are committed to quality and safety allows us to grow our family and better serve our customers and our communities. We look forward to continuing our long-standing traditions, together.”

The acquisition significantly expands Robinson’s fabrication capacity while establishing a strategic platform for vertical integration, operational optimization, and long-term industrial growth.

The Lakeland facility is currently 100% occupied and fully operational as a heavy industrial and metal fabrication facility. The property consists of multiple industrial buildings totaling approximately 90,000 square feet of gross floor area and is specifically configured for advanced fabrication operations, including production, machining, painting, sandblasting, shipping, and support functions.

Extensive Manufacturing Infrastructure and Installed Equipment

The acquisition includes a comprehensive suite of industrial manufacturing equipment and infrastructure designed to support large-scale fabrication operations, including:

- Paint and sandblasting facilities
- Plate roll, saws, and press brakes
- Waterjet, plasma, and laser burn tables
- Three horizontal boring mills
- Vertical mills and four industrial lathes
- Multiple overhead cranes and numerous jib cranes throughout the facility with lifting capacities up to 25 tons

The property also features high-bay shop space, mezzanines, steel-framed industrial buildings, utility infrastructure supporting heavy manufacturing, on-site parking, yard space, and ancillary storage structures. **Strategic Platform for Growth and Vertical Integration**

Robinson noted that the acquisition creates a scalable operational platform capable of supporting internal supply chain management, reducing dependence on third-party fabrication vendors, and enhancing cost containment initiatives.

The combination of installed heavy equipment, specialized shop layouts, and an experienced workforce allows Robinson to immediately leverage the facility for ongoing production while positioning the operation for future expansion and optimization.

The acquisition delivers:

- A turnkey metal fabrication operation
- Owned industrial real estate with substantial scale
- Installed equipment and manufacturing infrastructure
- Operational continuity

With this acquisition, Robinson further strengthens its position within the industrial manufacturing sector while reinforcing its commitment to operational excellence and strategic growth.

About Robinson Holdings

Robinson maintains its 130+ year reputation as a market-leading, industrial fan manufacturer founded on world-class technical expertise and outstanding customer service. Now in its sixth-generation of family leadership, it is looking toward its future growth; building on a strong brand reputation of innovation and quality to deliver industry-leading air-moving equipment, fabrication, and service to its customers.
